

## Plant Part Identification

Learn all about the parts of the plant! Cut out the labels below and glue them into the correct box on the next page. When you're done, color in your beautiful flower!

**Seeds**

The **seed** is the start of the plant and contains plant material that can develop into another plant.

**Stem**

The **stem** supports the plant and carries water and nutrients up and down to all parts of the plant.

**Flower**

The **flower** comes in different shapes, sizes, colors and scents to attract various pollinators.

**Leaf**

The **leaves** soak in water, air and sunlight to make food for the plant. This process is called photosynthesis.

**Roots**

The **roots** help to hold the plant steady in the ground, and suck up water and nutrients from the soil.
